PROFESSIONAL SUMMARY

BS Information Technology student specializing in mobile and web applications, with hands-on experience in full-stack development for both front-end and back-end systems. Skilled in structuring application logic, solving technical problems, and turning requirements into working software. Detail-oriented, adaptable, and eager to keep learning while building reliable, user-focused solutions.

WORK EXPERIENCE

Maragondon, Cavite

Freelance Full Stack Developer – Amora Flora (E-commerce Mobile and Web Application)

- Developed the front end and back end of an e-commerce mobile and web application, covering product browsing, ordering, and core store features.
- Built and connected application logic, databases, and user interfaces so customers and administrators could manage products, orders, and day-to-day store operations.
- Translated client requirements into a working system, tested features, applied revisions, and delivered a functional solution aligned with the project scope and agreed deadlines.

PROJECTS

National University – Dasmariñas

Capstone Project – LegalLink (Law Firm Online Consultation System)

- Served as project manager and full-stack developer, leading planning, the technical paper, and both front-end and back-end development of the system.
- Coordinated team responsibilities, project schedules, and deliverables from requirements analysis through design, development, testing, and documentation.
- Provided a well-known law firm in Silang, Cavite with a well-developed system for online consultation and legal services tailored to the firm's operational needs.
